

# HTML – Session 1

Reproduce the following pattern using HTML and CSS. Your code should be valid ! Use the W3C validator to check your document structure.

Create a folder named “assets” in your project and put an image, a video and an audio file ( You can find some on the internet).

## Iteration 1 - Inline & Blocks elements

### Baby Steps

Lorem ipsum dolor sit amet consectetur adipisicing elit.

**Corrupti**, molestias illo fugiat quo ad quos deleniti cum nam iste ? Distinctio **dolor** nulla at pariatur eveniet **necessitatibus** praesentium molestias, ullam cupiditate.

## Iteration 2 - Simple list

1. Open a text editor (Visual Studio Code, Atom, Sublime Text...)
2. Type some (valid code)
3. Open your file with a web-server (lite-server...)
4. Visit the page on your favorite browser

## Iteration 3 - Nested List

1. News
2. Culture
  - Cinema
    1. Drama
    2. Action
    3. Science Fiction
      - Best Ranked
      - More viewed
      - Lastest
    4. Horror
  - Music
  - literature
3. Fooding
4. Sport

# Iteration 3 - Simple table

spade	heart
diamond	heart

# Iteration 4 - A more complex table

		First group		Second Group	
	Person	Singular	Plural	Singular	Plural
Present	1	I code	We code	I succeed	We succeed
	2	You code	You code	You succeed	You succeed
	3	He/She codes	They code	He/she succeeds	They succeed

# Iteration 5 - Players

Pay attention to formats (mp3/ogg for audio, mp4/webm for video).  
Use the HTML5 audio and video tags to reproduce the example below.  
Test it on different browsers.

0:00 / 9:56

0:00 / 0:12
